

E2 fixed development calibration: S/S sampling

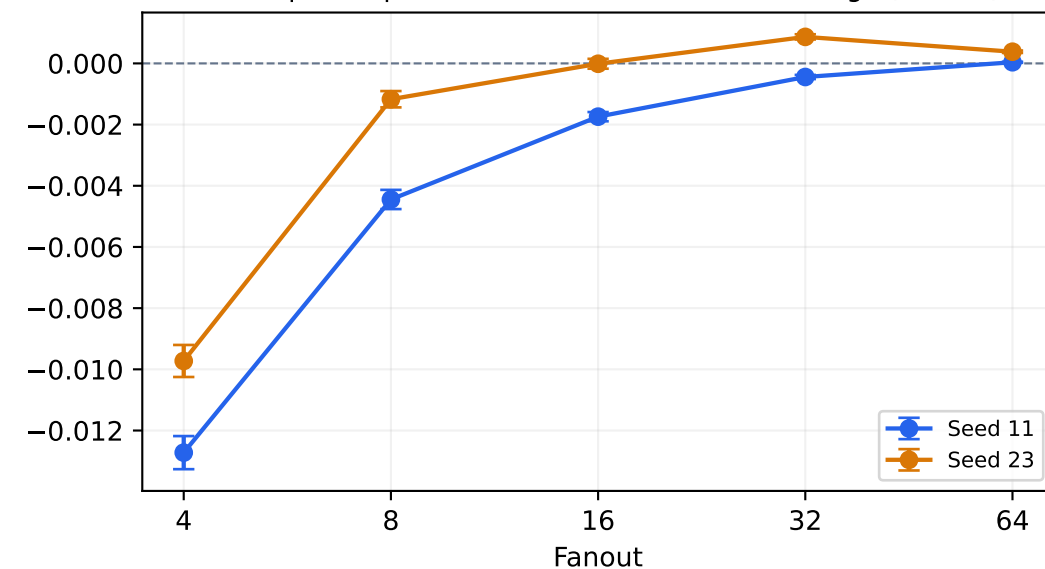

Full valid: micro MRR change (R=8)

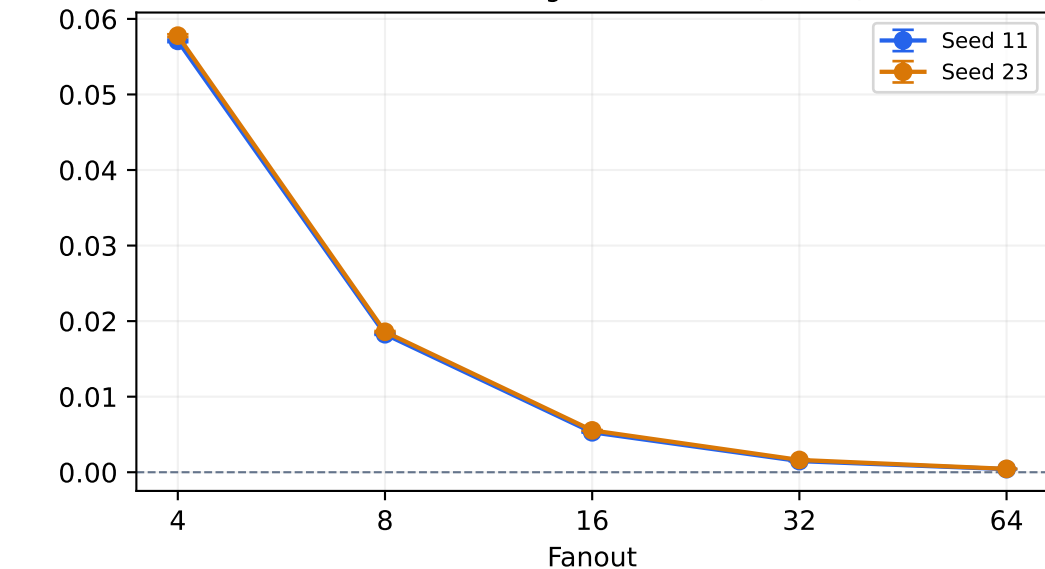

Development panel: direct-parent score change (R=128)

Development panel: distant-ancestor score change (R=128)

Fixed all-node V: geometric MSE (R=128)

Error bars: Monte Carlo SE across graph repetitions. Changes are relative to each frozen full reference.
Structure uses the covered development panel; these are not confirmation results.
